Subject: OU7 Seep Analyses

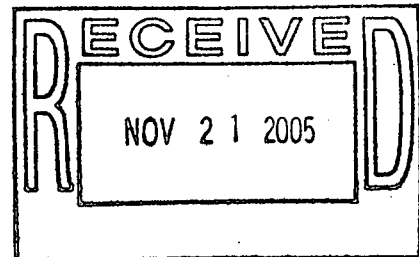

Jean and Carl,

We have received analytical results for VOCs for the months of June and July. All performance objectives were attained, thereby achieving the terms of the agreement on frequency of VOC sampling that we reached at our June 16th meeting. Therefore, the next sampling for VOCs will be in December.

Analytical results for semi-volatile organic compounds (SVOCs) for July also met all performance objectives. No SVOC samples were collected in June. Another sample for SVOC analyses was collected in August. Results should be available soon.

As Joe Legare indicated in his letter of September 11 transmitting the OU 7 SAP, we will schedule a meeting to review the results as soon as we receive the analytical data.

Tom Greengard
